

Kuan-Ting (Larry) Chen

+886 905-108-670 | larrybrown901120@gmail.com | [kutchen](#) | [larrychen20011120](#) | [HomePage](#)

Education

National Yang Ming Chiao Tung University, [Advanced Database System Laboratory](#)

Hsinchu, Taiwan

M.S. in Computer Science and Engineering (Advisor: Prof. Wen-Chih Peng)

2024/09 – Present

- Research: Sports Analytics, Large Language Models, and Reinforcement Learning
- **Member, The Phi Tau Phi Scholastic Honor Society**
- GPA: 4.3/4.3; 2 Academic Excellence Awards; 2 publications; AAI Student Volunteer

National Cheng Kung University, [Intelligent Knowledge Management Laboratory](#)

Tainan, Taiwan

B.S. in Computer Science and Information Engineering (Advisor: Prof. Hung-Yu Kao)

2020/09 – 2024/06

- Research: Natural Language Processing, Hateful Meme Detection, and Fact Checking
- GPA: 4.21/4.3; 1 Academic Excellence Award; 3 extracurricular awards

Experience

Student Project Lead, [Precision Sports Science Research Project](#)

2025/05 – 2026/09

- Coordinated 5 subprojects as the student lead, managing cross-team integration, meetings, and demonstrations.
- Developed **CoachAI+** badminton environment and **BadmintonTwin**, and contributed to **BadmintonReels**.
- Currently helping develop **BadmintonGPT** by turning subproject functions into MCP tools for a unified AI assistant.

Projects

BadmintonTwin: An LLM-based Virtual Badminton Player

[Code](#)

- Developed a multi-agent LLM framework for controllable, player-specific badminton rally simulation.
- Built a hybrid RAG pipeline combining physical-state retrieval and semantic contextual memory from historical rallies.

Skills: Large Language Models · Retrieval-Augmented Generation · AI Agents · Imitation Learning

CoachAI+ Badminton Environment

[Code](#)

- Developed PDQN, HybridPPO, and HybridSAC baselines for hybrid action-space RL in badminton strategy optimization.
- Designed simulation environments and evaluation metrics by integrating coach knowledge into quantifiable objectives.

Skills: Reinforcement Learning · Hybrid Action Space · Simulator · PyTorch · Data Analysis

Medical Conversation Analysis System

[Code](#)

- Built a pipeline integrating speaker diarization and Azure ASR to generate doctor-patient consultation transcripts.
- Developed separate web and analysis servers, using medical NER to extract key medical terms and provide physicians with consultation transcripts and analysis results.

Skills: Python · Flask · SQL · Speaker Diarization · Azure Speech Services · Named Entity Recognition

Publications

Kuan-Ting Chen, Kuang-Da Wang, and Wen-Chih Peng. "BadmintonTwin: Tactical Memory-Augmented LLM Agents for Instruction-Conditioned Badminton Rally Simulation." **Under review at ACL Rolling Review**.

Tsan-Tsung Yang, I-Wei Chen, **Kuan-Ting Chen**, Shang-Hsuan Chiang, and Wen-Chih Peng. "Robust Detection and Source Identification of AI-Generated Images Using CNN and CLIP-Based Models." **AAAI Defactify 2025**. [[Paper](#)] [[Code](#)]

Awards

College Student Research Creativity Award

[Code](#) 2024/07

- Awarded to only ~5% of participants. Converted multimodal inputs and HurtLex knowledge into text, then finetuned HateBERT with Masked Language Modeling (MLM) objective function.

AI Cup 2023 Factual Text Retrieval and Verification Competition – Honorable Mention

[Code](#) 2024/03

- Achieved the 13th place out of 301 participants. Built a 3-stage fact verification pipeline using multi-source retrieval, BERT-based evidence selection, and BERT-based claim verification.

Meichu Hackathon Hacker Group (TSMC) – Second Place

[Code](#) 2022/10

- Applied transfer learning to YOLOv7 with strong data augmentation and multi-stage training, then deployed real-time inference on laptops and Raspberry Pi with REST API integration.

Technical Skills

Proficient: Python, PyTorch, Agentic AI, NLP, Reinforcement Learning, Machine Learning, vLLM

Familiar: C++, Computer Vision, Parallel Programming, Graph Neural Networks, CI/CD

Languages: Mandarin (Native), English (Fluent; TOEIC: 800)
